 [Figma - Projects](#)

Summary

Flutter developer and Computer Engineering graduate focused on mobile UI and Application development and product design. Experienced in independently designing, developing, and releasing production-grade Flutter applications using Firebase, Cloud Functions, authentication, AI integrations, localization, and in-app purchases. Skilled in building responsive interfaces, reusable component systems, secure cloud workflows, and complete mobile products from Figma design to App Store release.

Skills

- **Mobile Development** — Flutter, Dart, Responsive UI, Custom Widgets, Navigation, State Management (Provider), Form Validation, Theming, Localization, JSON Serialization
- **UI / Product Design** — Figma, Mobile UI/UX, Design Systems, Component-Based Design, Prototyping, User Flows, Light and Dark Themes
- **Backend and Cloud** — Firebase Authentication, Cloud Firestore, Firebase Storage, Cloud Functions, Firebase App Check, Firestore Security Rules, REST APIs, OpenAI API
- **Tools and Platforms** — Git, GitHub, Android Studio, VS Code, Xcode, Google Play Console, App Store Connect, Postman

Projects

[TaleVD — AI-Powered Illustrated Children's Story App](#)

01/2026 – 07/2026

Flutter, Dart, Firebase, Firestore, Cloud Functions, Firebase Storage, App Check, OpenAI API

- Independently designed, developed, and released a production-grade iOS application that generates personalized, AI-illustrated stories through structured content-generation workflows.
- Built the complete product experience, including customizable story creation, generation tracking, interactive reading, cloud-synced story management, editing, and account management.
- Developed a secure Firebase backend using Authentication, Firestore, Storage, Cloud Functions, Security Rules, and App Check, with server-side validation, credit transactions, AI requests, and purchase entitlement verification.
- Implemented Google and Apple authentication, subscriptions, purchase restoration, localization, content moderation, reporting, email verification, and account deletion.
- Managed the complete App Store release lifecycle, including production configuration, privacy compliance, subscription setup, release testing, store assets, and submission.

[Focial — AI-Powered Food and Social Media Platform](#)

09/2024 – 09/2025

Flutter, Dart, Figma, REST APIs, In-App Purchases

- Owned the complete Flutter frontend and mobile UI development of a food-focused social platform combining social networking, recipe discovery, and AI-assisted cooking.
- Designed the product experience in Figma and implemented user profiles, follow systems, personalized feeds, post creation, comments, recipes, bookmarks, and search.
- Integrated a dataset of approximately 75,000 meals, enabling recipe discovery and meal tagging within social posts.
- Built AI assistant interfaces for conversational cooking assistance, recipe generation, voice input, and image-based ingredient input.
- Implemented premium feature states and a functioning Google Play in-app purchase flow, including purchase testing.
- Collaborated in a three-person team and managed Google Play Console setup, closed testing, store assets, and submission processes.

Experience

Mobile & AI Development Intern, İzmir Bakırçay Üniversitesi

Feb 2024 – Jun 2024 | İzmir, Türkiye

- Collaborated in a four-person team on an AI-assisted stock market prediction product approved for KOSGEB support.
- Contributed to forecasting experiments using historical stock data and financial news sentiment on Google Cloud.
- Designed the initial Flutter UI structure, screen flows, and presentation of model-generated predictions.

Education

B.Sc. in Computer Engineering, İzmir Bakırçay University

Sep 2020 – Jun 2024 | İzmir, Türkiye

GPA: 3.02/4.00

Languages

Turkish — Native | **English** — Upper-Intermediate, B2
